

KORAFLEX PLUS HAS GOT IT ALL COVERED.

Easy installation.

Butyl adhesive backing means no prefabrication or welding and the material is flexible, stretching 70% lengthways and 15% widthways.

Three colours.

Available in a choice of red, grey and black to blend in with a range of roof tiles and reduce risk of theft.

Environmentally safe.

Lead and solvent-free composite ensures no chemical leeching and suitability across all roof types, including water-harvesting systems.

Long-term value.

Extremely resistant to UV and temperature variation from -40°C to 90°C, with a 15-year RoofSpec® guarantee provided as standard.

Wienerberger

* Pack includes 2x5m rolls,
width 300-450mm, weight 6.65kg.

A specialist solution for faster, easier and greener roof flashing.

Koraflex Plus is a high quality lead replacement flashing solution offering easy installation and unrivalled environmental safety.

It features a flexible aluminium mesh inner, a weather-resistant outer layer and a split backing film for easy installation. BBA-approved, available in three colours with a 15-year RoofSpec® guarantee and a 25-year product warranty, it works just like lead, but with an adhesive backing that removes the need for prefabrication or welding.
